Profile

I am a fifth-semester Computer Science student at BINUS University with interests in Data Analytics, Data Engineering, Data Science, Machine Learning, Software Engineering, and Application Development. I have hands-on experience in data-driven projects, machine learning, and application development, along with six years of experience selling Roblox game items through Indonesian and international marketplaces. I am a motivated learner with strong communication, time management, and problem-solving skills.

Areas of Expertise

Team Management - Big Data Processing - Database Management - Data Analytics - Business Analyst - Data Engineer - Data Science - Ai Engineer - Software Engineer Digital Marketing - Accounting

Project Experience

School of Computer Science, Binus University

title: “Loan Lending Risk Prediction ”

- Developed an end-to-end big data pipeline for processing Lending Club loan datasets.
- Implemented batch processing using Apache Spark, where incoming data was processed in batches for efficient large-scale data processing.
- Configured Hadoop Distributed File System (HDFS) as the distributed storage solution.
- Built an ingestion layer to collect, transform, and prepare data for analysis.
- Applied the K-Means clustering algorithm to identify customer risk segments for loan analysis.
- Integrated the processed data into MySQL and developed interactive Power BI dashboards to visualize customer risk insights.

School of Computer Science, Binus University

title: “Public Infrastructure Reporting System”

- Developed an infrastructure damage reporting application for citizens to submit and track reports.
- Built the mobile app using Flutter and Dart, with authentication, report submission, and photo uploads.
- Developed an admin dashboard using React, Vite, and JavaScript for report and user management.
- Built the backend using NestJS and Prisma with PostgreSQL and Supabase.
- Integrated Google Maps API and GPS for location-based infrastructure reporting.

School of Computer Science, Binus University

title: “Crop Yield Forecast”

- Developed a deep learning-based crop yield prediction system to analyze and project agricultural land productivity.
- Designed and implemented neural network architectures (LSTM and Conv-LSTM) using PyTorch, incorporating a Bahdanau Attention mechanism to capture seasonal patterns in time-series climate data.
- Performed preprocessing and feature engineering on weather data (precipitation, solar radiation, temperature) and soil characteristics using scikit-learn.
- Built an interactive dashboard with Streamlit for real-time data visualization and model inference.
- Managed and processed large-scale datasets in Parquet format using pandas and PyArrow for computational efficiency.

Working Experience

Itemku Seller

2019 – Present

- Achieved 10,000+ successful sales of Roblox in-game items through the Itemku marketplace.
- Monitored market prices and competitor trends to develop competitive pricing strategies.
- Managed product listings, inventory, and order fulfillment to ensure timely transactions.

G2g Seller

2024 – Present

- Achieved 400+ successful sales of Roblox in-game items through the G2G marketplace.
- Monitored market prices and competitor trends to develop competitive pricing strategies.
- Managed product listings, inventory, and order fulfillment to ensure timely transactions.

Education

Computer Science Undergraduate (Streaming Database) at BINUS University | GPA 3.68

Skill

- Coding skill: Programming (C, Python, Java, C++), Front End (HTML, CSS, Tailwind Css React, Vite), Back End (NestJs).
- Big Data Processing / Data Analytics (Python, Spark, Hive), Data Visualization (Power Bi, Tableau), Database Management (PostgreSQL, MongoDB, Mysql), Data Engineering (Airflow)
- Softskill: Teamwork, Problem-Solving, Creative Thinking, Planning

Organizational Experiences

Keluarga Mahasiswa Buddhis Dhammavaddhana

2025 - Present

- Supported sales and fundraising initiatives during organizational events.
- Managed customer interactions and assisted in promoting products.
- Contributed to achieving sales targets through effective teamwork and communication.

Volunteer and Committee Experiences

Volunteer – Teach for Indonesia & Tzu Chi (2×)

- Educated participants on proper waste segregation based on waste categories.
- Assisted in environmental awareness activities and community service programs.

Certifications

- Revo Intro to Data Analytics Certifications
- Head of Mobile Legend Notredame Cup 2023
- Techfest Participation Binus University 2026
- Data Science Fit Competition 2026
- Chess Participation Saint John 2023

Language

- Indonesia (Native)
- English (Intermediate)
- Mandarin (Basic)
